

Declaration of the BGH group regarding

Ordinance EG No. 1907/2006 on Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) including the valid candidate list incl. Annex XIV, Annex XVII

We registered the substances that BGH is eligible to register including all applicable utilizations of these substances and can herewith confirm that all products produced by BGH correspond to the current valid REACH ordinance. In terms of REACH, we are however a downstream user of substances for the majority of our products. Our suppliers assured us that they had registered their products if these are subject to registration as per REACH taking into consideration our utilization of these substances as well.

For cases in which our suppliers are downstream users too, we were assured that they take care that their suppliers adhere to the obligations of the REACH ordinance. With regard to SCIP we consider the requirements acc. to (EC) 2018/851. We, BGH, are not subject to SCIP reporting because our products neither include any of the materials stated on the current REACH-SVHC-List nor do they exceed any of the limit values.

From our point of view, we can confirm that every necessary step was taken to sustain the supply chain. Therefore, you will as well be reliably supplied by BGH in future.

We trust that with this information, we provide the necessary clarity in this matter and at the same time contribute to strengthen our cooperation further.
